- Redux
- Bootstrap3
- RESTful
- Node
- Golang
- Beego
- MongoDB
- Mysql
- Docker

EXPECT

I'm a self-motivated and passionate web developer, focusing on front-end and understanding back-end and product design. My goal is to be a full-stack developer.

Now I'm interested to join an Internet firm as a senior front-end developer. Preferred work location is in Singapore.

- Developing the corporate website and additional softwares for internal projects, including OA, CMS and ERP system.
- In charge the front-end development.

HOYOYO TECHNOLOGY (SHENZHEN) CO. LTD / SENIOR FRONTEND DEVELOPER
SHENZHEN   2013 - 2015
- Responsible for the front-end development and maintenance our e-commerce website, such as hoyoyo.com and prouter.com etc.
- Assisted Product Manager in optimizing UI and UX design.

SHENZHEN YOUYOU NET STACK TECHNOLOGY CO., LTD / OPERATIONS SPECIALIST
SHENZHEN   2012 - 2013
- Website promotion and user growth, the number of registered users increased from 0 to 50,000, and active users about 2000.
- Analysed operational data then adjusted operational strategies according to the data.

PROJECT EXPERIENCE

A FRONTEND FRAMEWORK BASED ON REACT AND REDUX ECOSYSTEMS
INDEPENDENT DEVELOPER   2015 - PRESENT
- Developed components based on ECMAScript 6 and LESS, then compiled into JavaScript and CSS using webpack and babel.
- 80+ common components are extracted for daily development, more related documents please visit my website teasim.com.

CONSTRUCTION INDUSTRY ERP SYSTEM BASED ON MICROSERVICE ARCHITECTURE
TEAM LEADER & CORE DEVELOPER   2015 - 2018
- Developed the web front-end with the React and Redux ecosystem, then integrate with Electron to improve the user experience.
- Implemented the API with Beego and Mysql. Used MongoDB to store some document-intensive data to simplify the database structure.
- Built automated deployment system using Docker and Swarm, automatically deploy applications to ECS of Alibaba Cloud.
- Git-based development workflows, using Eslint and Prettier to help us unify the code style.

CONTENT MANAGEMENT SYSTEM DEVELOPED USING THE BEEGO FRAMEWORK
INDEPENDENT DEVELOPER   2017
- Developed the front-end with jQuery, Bootstrap3 and Less.
- Implemented the RESTful API with Beego1.9 and Mysql 5.7.
- Built monolithic application of the MVC pattern.
  e.g. catnogo.com, lwhconst.com.sg
